BARBADOS

LOCATION

Barbados is the eastern-most Caribbean island.

It is located at 13.1N, 59.4W. The island, which is less than one million years old, was created by the collision of the Atlantic crustal and Caribbean plates, along with a volcanic eruption. Later coral formed, accumulating to approximately 300 feet.

It is geologically unique, being actually two land masses that merged together over the years.

CELLULAR PHONE SERVICE

Visitors who bring their cell phones with them on holiday must remember to ensure the roaming feature is activated prior to arriving in the island. Please note that receiving and making international calls on your mobile phone can be quite costly and you may wish to explore the alternative of renting a cell phone locally - contact Cable & Wireless at **1-800-804-2994** or visit them online at www.bmobile.com.bb or contact Digicel online at **digicelbarbados.com**

CURRENCY

The Barbados dollar is pegged to the USA dollar at an exchange rate of **US\$1 = BDS\$1.98**. US dollars are accepted island-wide and most stores and restaurants accept major credit cards and traveller's cheques.

DRINKING WATER

The Barbados Water Authority, a Government statutory corporation, is the sole provider of water services. The water service in Barbados is reliable and the water supply is safe and refreshing to drink.

ELECTRICITY

115/230 volts 50 cycles. Standard plug types in Barbados are two flat blades or flat blades with round grounding pin -most hotels provide converters for European or Asian appliances. North American appliances will not need converters.
